Dr. Karol Ann Moore Publishes Paper on Dyslexia and Culture

HOUSTON, Texas (September 15, 2023) – Dr. Karol Ann Moore, Director of Research and Associate Vice President of Curriculum and Instructional Design at Neuhaus Education Center, is pleased to announce the publication of a significant paper titled "A Cross-Orthographic View of Dyslexia Identification" in the special issue on dyslexia and culture of the *Journal of Cultural Cognitive Sciences*. This publication marks a significant milestone in Moore's academic career and has been co-authored with esteemed advisors from Texas A&M University.

The paper, which was initially submitted for publication in September 2022, has undergone rigorous peer review and several revisions, reflecting Moore's commitment to academic excellence. It offers a fresh perspective on dyslexia identification when considering the complexities of the written system (i.e., orthography) and provides valuable contributions to the field of cognitive science. In addition, it offers the potential to significantly impact dyslexia assessment and intervention strategies to improve outcomes for students identified with dyslexia.

Moore and Neuhaus Education Center are thrilled to share this publication with the academic community and the broader public. The research paper is available for download and review on ResearchGate at the following link: www.researchgate.net/publication/373600079_A_cross-orthographic_view_of_dyslexia_identification.
